

JOB DESCRIPTION

Title:	Intermediate or Senior Software Engineer
Department:	Engineering

About BorderWare:

BorderWare Technologies Inc is a dynamic, fast paced company at the forefront of Internet messaging security technology. Based in Mississauga, the company offers competitive salaries, a stock option plan, excellent benefits, flexible working conditions and outstanding opportunities for professional growth. For further information, please visit us at: www.borderware.com.

Responsibilities:

BorderWare is seeking an Intermediate or Senior Software Engineer to make substantial contribution to the design and development of BorderWare's next generation Firewall Appliance. The successful candidate will also participate in sustaining the existing firewall product by interacting with customers, technical support and the development team. This is an excellent opportunity for someone who is interested in rolling up their sleeves and being a key contributor to cutting edge Internet security solutions.

Required Technical Skills and Experience:

- A university degree in computer engineering/science or equivalent;
- User Application and Protocol level experience with NAT, DNS, HTTP, FTP, telnet and VPN;
- relational databases and SQL, like PostgreSQL;
- Unix sockets;
- C language experience, shell scripting;
- Designed and Developed on a Unix based platform (Unix/Linux/FreeBSD);
- Ability to adapt and grasp new concepts fast;
- Detail oriented, flexible and organized.

Other Desirable Qualifications:

- QOS, VLAN, TCP/IP stack, routing mechanisms;
- Network devices such as firewalls, routers, switches;
- Excellent communication skills;
- Project and product management fundamentals.
