

JOB DESCRIPTION

Title:	Web Developer
Department:	Engineering

Overview of Position:

BorderWare is looking for a bright and talented Web Developer with 2 to 3 years' experience designing and developing user interfaces for enterprise level products. This individual will be responsible for working with the UI development team in the design and development of next generation user interfaces for BorderWare's industry leading internet messaging security products.

The Web Developer will be an integral member of the BorderWare Development team, and will also work closely with Product Management and Systems & Integration Testing to establish UI requirements and to ensure the timely and effective delivery of the product. In addition to development responsibilities, the successful candidate will be responsible for creating accurate work estimates, design documentation, and mock-ups/prototypes for proposed solutions. Overall, he or she must thrive and be successful working in a fast-paced, dynamic environment with minimal supervision.

Required Skills and Experience:

- PHP (4.x, 5.x), Object Oriented Programming
- HTML/XHTML/Javascript/CSS
- Standards Based Web Development
- Solving cross-browser DHTML issues
- Knowledge of relational databases and SQL (MySQL, pgSQL)
- Exceptional written and verbal communication skills.
- Undergraduate degree in Computer Science or equivalent.

Other Desirable Qualifications:

- AJAX, JSON, and XML experience
- Experience working with Prototype and script.aculo.us
- Linux/FreeBSD, BASH
- Basic Apache Administration
- Basic Knowledge of TCP/IP networking (routing, etc)
- Special consideration will be given to candidates who have demonstrated the creative "eye" for designing and building user interfaces including experience with usability, layout, and work flow.

About BorderWare:
